

User Manual

There are two menus for navigating through the application. One bottom navigation menu for the most commonly used pages; the list of exhibitors, the map of the exhibition hall, the schedule and the extended menu. In the extended menu there are some additional menu options such as navigation to the sponsors page and the QR-reader.

Upon opening the application, the list of exhibitors is displayed, click on a company's name to display more information about them. When the list of companies is displayed shaking the phone will produce a popup window with a randomly selected company.

To reach the map of the exhibition hall click the location pin icon in the bottom navigation menu. To zoom in and out make pinch gestures on the screen and drag the image around using one finger. Click on a showcase to see which company is located there.

The calendar icon in the bottom navigation menu represents the page holding the schedule for the fair. A list of events is displayed and clicking an event initiates a popup window with more information about the event.

Clicking the forth and last icon of the bottom navigation menu displays the menu page, which can also be used to reach the previously mentioned pages. And additional pages such as; a page displaying information about which companies that are sponsoring the fair and a QR-reader for scanning QR-codes

Please note: If the server needs to be started, see the Servlet section of the Developer Manual.
